Welcome to **SUPER MINDS** **SECOND EDITION**

Rediscover *Super Minds*!

Welcome to *Super Minds 2nd Edition*, a thoroughly updated and enhanced new edition of a much-loved English course from this renowned author team.

Accompany your students on exciting adventures with the intrepid characters, as they enjoy creative projects, authentic CLIL content, and the flexibility of the extensive skills practice, whilst working towards B1 level on the Common European Framework of Reference for Languages (CEFR).

Aligned to the Cambridge Life Competencies Framework, *Super Minds 2nd Edition* has a particular focus on developing Critical and Creative Thinking skills. In addition, throughout the course, students will develop their working memory, inhibitory control and cognitive flexibility, three key cognitive control functions for young learners. Together with the universal values introduced in each story, these skills help create curious and successful lifelong learners, and socially responsible individuals.

Super Minds 2nd Edition is supported by a comprehensive digital package in *Cambridge One*, a new-generation learning environment, including big-screen quality animated videos for the classroom, Practice Extra with digital activities for home or lab learning, together with comprehensive data views, rewards, and the capacity to assign homework digitally.

Super Minds 2nd Edition is a course that combines the very best of rich classroom experience with contemporary pedagogical research.

Super Minds 2nd Edition: The thinking course, revisited

Super Minds is much loved by millions of learners of English in over 70 countries. Since its publication we have carried out extensive research to find out what teachers and learners love about *Super Minds*, and what could be updated and made even better.

While this new and improved 2nd Edition of *Super Minds* maintains its easy-to-use, comprehensive language syllabus and unit structure, the experience of teaching and learning with the course is thoroughly refreshed and contemporary.

The Cambridge Life Competencies Framework

Our world is changing fast and we need to prepare our students with the skills and experiences that go beyond learning an additional language.

Our job as Primary educators is complex. How do we prepare our students for a future which may be dramatically different from the present? Experts say there are some key skills which will be essential for the citizens of tomorrow: working together with people from around the world, thinking creatively to solve problems, analysing sources more critically, communicating our views effectively, and maintaining a positive mindset in an increasingly complex world.

The Cambridge Life Competencies Framework supports teachers in this challenging area – we understand that the engaging and collaborative nature of the language classroom is the perfect place to develop and embed these key qualities.

Creative Thinking

This project in Unit 3 of the Student's Book helps learners develop Creative Thinking skills by using different media to make and describe their own designs.

Cognitive control functions

Successful language learning requires our learners to be in control of their own learning and of themselves. To do this, they need to:

- set goals
- organise learning over time
- focus attention to be able to stay on task
- adapt behaviour in order to overcome challenges and reach goals.

To manage these behaviours successfully, the brain uses **cognitive control functions** which determine students' success in learning and have a significant influence on their future success and wellbeing.

Activities in *Super Minds 2nd Edition* have been designed to enhance the **three core areas** of learners' cognitive control functions:

Working memory

is the ability to hold information in mind so that certain tasks can be completed.

This activity in the Introductory Unit of the Workbook helps to improve learners' working memory.

3 Imagine a town and write five things it has got. Then ask and answer.

Has your town got a hospital?

No, it hasn't. It's got ...

Inhibitory control

refers to the abilities to focus attention and control our emotional and behavioural responses.

This activity in Unit 1 of the Workbook helps to improve learners' inhibitory control.

Cognitive flexibility

is needed for solving problems, and enables students to look at issues from different viewpoints, to think 'outside the box' and to adapt to changing conditions.

This activity in Unit 3 of the Student's Book helps to improve learners' cognitive flexibility.

1 Which children are helping? Look and tick ✓.

Unit walkthrough

is presented in an opening illustration which features the *Super Minds* characters and sets the scene for the main story of the unit. Full-colour digital or printed flashcard sets help learners practise vocabulary.

The Big Question

is a new feature that gives a gradual introduction to Enquiry-Based Learning. Each *Big Question* is directly related to the unit topic and is explored throughout the unit with further ideas for exploitation available in the Teacher's Book.

Fun and informative songs

practising and extending the vocabulary and language of the unit feature throughout *Super Minds 2nd Edition*. Karaoke song videos can be found in Presentation Plus and the teacher and learner resource areas in *Cambridge One*.

Contextualised language

is presented in new 2nd Edition story-based animated *Language focus* videos, featuring the entertaining character Penny the penguin. Each unit has two animated videos which can be accessed through Presentation Plus and the teacher and learner resource areas in *Cambridge One*.

Episodic adventure stories

Brand new big-screen quality animated story videos

are a new feature of the 2nd Edition, and can be accessed through Presentation Plus and the teacher and learner resource areas in *Cambridge One*.

Universal values

are introduced with each story and supported with extension activities in the Teacher's Book. Thinking about values and applying them when interacting with others is a key life competency and helps build socially responsible individuals.

Phonics

in each unit link to the story. Further phonics practice can be found in the corresponding pages of the Workbook.

Extensive Skills pages

give practice of listening, speaking, reading and writing skills to extend learning.

Think and learn CLIL projects

integrate content and language, with students learning about other curriculum subjects in English so that their English is expansive. The CLIL syllabus has been specially designed to cover similar topics to those that students will be encountering in their first language at the same stage.

Brand new documentary-style videos

present the topic and the vocabulary of the CLIL pages.

Create that! and Do that!

offer further opportunities for students to develop their creativity as well as practise their listening skills.

Project

Each Think and learn spread culminates in a project that can be carried out in class or set as homework.

Think back and Group check

review pages consolidate learning and alternately promote independent and collaborative learning.

- Put students into groups of four. They swap and read each other's texts.

1 Read and number the pictures.

Amelia gets up at six o'clock. She walks to school at nine o'clock. After school, she meets her friend Ellie. At five o'clock, Amelie plays with Ellie in the park. Then they listen to music in Amelia's house. Amelia has dinner at eight o'clock.

- Encourage students to talk about their habitats as they are working.
- Finally, students write sentences below their habitat, saying what kind of habitat it is and what animals there are in it.
- The finished habitats can be displayed around the classroom. Alternatively, take photos of them to save to their digital portfolios.

4 **Project** **SB p55**

Find out how much fruit and vegetables weigh. Then write and draw two food sums.

Aim: to enable students to apply what they have learned about how we weigh food

- Students work in pairs. Give each pair a piece of paper and tell the class they are going to do food sums.
- Pairs read and look at the example food sums.
- Pairs then choose two kinds of fruit/vegetables from Activity 2 on page 54, to use in their sums. Alternatively, they can choose and weigh some of the real fruit and vegetables that you have provided on kitchen scales.
- Students then decide on the numbers of fruit/vegetables that they want to use in their sums and calculate how much they weigh by adding them up.
- You can help them with another example on the board, e.g. $2 \text{ lemons are } 60g + 60g = 120g$ and $2 \text{ mangos are } 200g + 200g = 400g$. So $120g \text{ of lemons} + 400g \text{ of mangos} = 520g$.
- Using the example picture as a model, they draw their fruit/vegetables and write their sums leaving the answer (= g) section empty.
- Pairs then present their sums to the class. They read out the sum and class members answer it.
- Finally, pairs can write the correct answers in their sums.
- Take photos of the food sums and save them to students' digital portfolios.

3 **WB p55** Do the food sums.

Aim: to give students practice in solving Maths problems

Key: (2) $50g + 300g = 350g$, (3) $350g + 50g = 400g$, (4) $350g + 400g = 750g$

4 **WB p55** Look, read and answer yes or no.

Aim: to give students practice in solving Maths problems

Key: Yes

Lesson review

Aim: to review what students have learned in the lesson

- Write the following prompt on the board: *Today I've ...*
- Elicit from students what they did today.
- Write it on the board. Students copy it into their notebooks.

Extension activity

Aim: to deepen understanding of units of measurement

Write a list of ingredients for a cake and the quantities needed (e.g. 200g sugar, 200g butter, 4 eggs, 200g flour).

Ask students to imagine they have to make a bigger cake that requires 50% more of the ingredients in the recipe.

Students work in small groups and come up with the new quantities (e.g. 300g sugar, 300g butter, 6 eggs, 300g flour).

- 3** How many grams of fruit and vegetables are there?
Do the food sums.

1

$$700\text{g} + 250\text{g} = \underline{\hspace{2cm}} \text{g of vegetables}$$

2

$$200\text{g} + 450\text{g} = \underline{\hspace{2cm}} \text{g of fruit}$$

3

$$200\text{g} + 150\text{g} = \underline{\hspace{2cm}} \text{g of vegetables}$$

4

$$500\text{g} + 300\text{g} = \underline{\hspace{2cm}} \text{g of fruit and vegetables}$$

- Dictate the sound sentence from SB Activity 4 while students write. They check in the Student's Book.
- Teach some special words with the long /u:/ sound: *do, to* and *you*.

Extension activity

Aim: to discuss the value of tidiness

- Focus on what happens to Flash because her room is so messy (she cannot go to the park).
- Elicit why tidiness is important and ask for examples from students of when being messy has meant they cannot do something.

Note: Some of this discussion may need to take place in L1.

Flash's mum: Oh, your T-shirt. Let's put it in the wardrobe.

Flash: No, Mum, no!

Flash's mum: I don't believe it!

Flash: Sorry, Mum. No park for me today.

Extension activity

Aim: to discuss the value of being generous

- Focus on what happens in frame 8 of the story and how the bus driver is generous (he offers to take the children to the beach).
- Discuss why the bus driver is generous (he may be a generous person or he was generous because Whisper and Thunder were generous first).
- Elicit why this value is important and examples of when students have been generous or when people have been generous to them.

Driver: Thanks.

Thunder: You're welcome.

Driver: Here we are!

Misty: Where's the beach?

Woman: What beach? This is the bus to the airport.

Driver: Now it's my turn to help you! Let's go to the beach!

2 Read and complete the text.

- Pre-teach *Museum of Transport*.
- Students look at the picture in the Student's Book. Elicit what they can see. Students find their stickers and cut them out together with the backing paper.

- Say the words. Students hold up the relevant sticker.
- Play the recording for students to listen and place (but not stick down) their stickers, e.g. *Take the bird. Put the bird in the sky.*

Extension activity

Aim: to practise close observation

Make four areas on the walls of the classroom. Each is for display of the pictures and texts from SB Activity 4: car, bus, train or plane.

Students display their drawings and text in the appropriate place, but they don't put them together. They put all the drawings at the top of the space and all the texts at the bottom.

Go around numbering the texts and write letters on the pictures.

Students work in pairs, reading and matching the pictures with the texts (not their own).

See which pair got the most matches correct.

2 Ask and answer. Which transport do you use?

On Tuesdays, I ride my bike to school.

3 Read and tick ☒ the things that the car has got.

This car is amazing because it's very long. Inside there are TVs and beds and a lot of sofas for all your friends. There is a swimming pool too! They use this car in films or for special parties.

4  Draw and write about an amazing car, bus, train or plane.

This is my bus. It is blue and red. It's very big. It's got a bed in it. I'd like to go to China in it with my dad.

What transport would you like to take? Make a transport calendar.

Aim: to enable students to build on what they have learned about transport

- Give each student a piece of paper and tell the class they are going to make transport calendars.

- Students copy the calendar table.
- They draw icons to show all the kinds of transport they took on each day.
- Students then label the different icons.
- Once students have finished their transport calendars, look at them as a class. Students answer the following questions: *Which means of transport does the class use the most? What is the most unusual means of transport a student took? Did anyone travel on land, by air and on water this week? Who took the most different kinds of transport?*
- Take photos of the calendars and save them to students' digital portfolios.

- Students have to write six sentences to describe the scene drawn by another group. They can use the sentences in Activity 1 as a model.
- Go around the class to monitor students' work.
- An alternative is to ask students to include three sentences that are not true about the scene. The owners of the drawing will identify the false sentences and correct them.

Extension activity

Aim: to practise role plays

In pairs, students practise a simplified version of the role play in WB Activity 1:

A: *Can I help you?*

B: *Yes, I'd like to join the*

Or maybe you'd like to go camping in the mountains or by the sea?
Who is with you? Are you with your mum and dad? Or grandma and grandad? Or are you visiting your cousins?
